	Examiner CongVan Tran	Art Unit 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Sept. 20, 2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1-12, are rejected under 35 U.S.C. 102(e) as being anticipated by Karaoguz (2004/0203931).

Regarding claims 1-2, 5-9, Karaoguz discloses an using signal generated location information to identify and list available devices comprising: providing a portable device storing data representing locations within a research area relevant to the market research (see fig.6, element 620, paragraph [0048]); inputting transmitter location data in the portable device representing selected locations of the wireless

transmitters relative to the research area (see fig.6, element 635, paragraph [0048]); and associating transmitter representative data representing each wireless transmitter with respective transmitter location data in the portable device to produce data mapping the locations of the wireless transmitters with the associated transmitter representative data (see fig.6, elements 620, 625, 630, paragraphs [0049-0050]).

Regarding claim 3, Karaoguz discloses an using signal generated location information to identify and list available devices comprising: a portable device storing location data representing locations within a research area relevant to the market research (see fig.6, element 615, paragraph [0048]); and a processor within the portable device operative to associate the location data with data representing respective wireless transmitters positioned at the locations to produce data mapping the locations of the wireless transmitters with the data representing the respective wireless transmitters (see figs.6-7, elements 620, paragraphs [0045-0050]).

Regarding claims 4, 10-12, Karaoguz further discloses an interactive display coupled with the processor, the processor being operative to control the interactive display to display a layout map representing the research area, the system further comprising a user interface coupled with the processor to input transmitter data representing a wireless transmitter, the processor being operative to control the interactive display to display transmitter-representative data representing the wireless display on the layout map, the interactive display being operative to receive data representing repositioning of the transmitter-representative data on the layout map by a user and providing the location data, the interactive display being operative to supply

the location data to the processor (see fig.6, elements 320, 640, fig.7 paragraph [0051-0059]).
